TECHNICAL SKILLS AND INTERESTS

Technologies: HTML,CSS,VLSI,Python,IOT.

Developer Tools: Matlab,keil vision,Cadence,Arduino

Area Of Interest:Technology,Sports,Yoga

PROJECTS

Two-Factor Authentication Based Door Lock System Using Face Recognition and OTP Generation

May 2026

- Developed a secure smart door lock system using Face Recognition and OTP-based Two-Factor Authentication, integrating image processing, OTP verification, and microcontroller-controlled door access to enhance security and prevent unauthorized entry.

CERTIFICATIONS

- VLSI system on chip design in Maven silicon.
- VLSI design and verification.
- Introduction IOT fundamentals.
- Embedded C Programming.

ACHIEVEMENTS

- Successfully collaborated with a team to achieve a commendable performance in a quiz examination, demonstrating effective teamwork, communication, and problem-solving skills.
- Led a team of 4 in Mini project development and successfully demonstrated a working prototype.
